

Julien DUBOIS

DevOps engineer

Currently working at BeOp as a DevOps engineer, I'm a web developer in my free time. Having first nurtured a passion for development, my interest grew then extended to cloud technologies.

Work experience

DevOps engineer

Since October 2024 BeOp/Collective Audience Montpellier

Description

In charge of the BeOp (becoming Collective Audience) infrastructure, monitoring stack and automation of technical processes. I help the BeOp tech team to integrate DevOps and cloud best practices.

Tech stack

AWS, Terraform, Cloudflare, Grafana, Prometheus, Loki, Github Actions, Docker, TypeScript, Clojure

Full-stack developer

From July 2021 to September 2024 BeOp Montpellier, France

Description

Officially in charge of backend and then fullstack development within the small BeOp technical team. I have recently been performing DevOps tasks on our cloud infrastructure.

Tech stack

AWS, Clojure, Github Actions, TypeScript, Java

DevOps Engineer

From July 2023 to May 2024 Beelong Sàrl Lausanne, Switzerland

Description

Internship then freelance

- *Internship* - Migrating to a Kubernetes based cloud infrastructure (GKE).
- *Freelance* - Migrating of a MySQL database to PostgreSQL, improvement of the monitoring stack and maintenance of the infrastructure.

Tech stack

Kubernetes, GKE, Google Cloud, Terraform, TypeScript (NodeJs), Gitlab CI, NestJS, PostgreSQL

Education

Computer engineering diploma

From October 2021 to September 2024 Polytech Montpellier Montpellier, France
DevOps engineer training in apprenticeship.

PeiP diploma (Polytech engineering school preparatory course)

From September 2019 to June 2021 Polytech Clermont Clermont-Ferrand, France
Training in mathematics and computer science

Scientific Baccalaureate

From September 2016 to June 2019
Madame de Staël High School Montluçon, France
With honor. Specialty SVT - ISN (Computer Science)
